DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to an electrochemical reactor and a process for its operation.

Group II, claim(s) 9-13, drawn to an electrochemical reactor.

Group III, claim(s) 14 and 15, drawn to a method for removing nitrogen oxides from an exhaust gas using an electrochemical cell.

Group IV, claim(s) 16-18, drawn to a nitrogen oxide removal system.

Group V, claim(s) 19-23, drawn to a chemical reactor.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each of the different claim groups fail to be linked by a corresponding technical feature. Groups I-IV each involve use of an electrochemical cell to decompose nitrogen oxides from a gas stream. This is the only common feature between each of these groups. However, such a process was known in the prior art, see for example admitted prior art JP2001-223687). Therefore, this common feature between groups I-IV does not provide a contribution over the prior art, and is thus not a special technical feature linking each of the groups to a single inventive concept. Further, group V does not require an electrochemical cell in the chemical reactor and also requires a surface coating layer which inhibits ionization of adsorbed oxygen. This feature is not present in any of groups I-IV. Therefore, group V lacks a corresponding technical feature with each of groups I-IV.

3. A telephone call was made to Surinder Sachar on 23 October 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
